Tuesday, 10 March 2009

According to Futuresource Consulting, a leading global research company that has tracked interactive whiteboard shipments for almost nine years the installed market for Interactive whiteboards IWB's are now two million units.

Market leader SMART has shipped more than one million of these boards as the inventor of the interactive whiteboard back in 1991.

Futuresource Consulting predicts that the IWB installed base will tripple over the next five years to be over 7 million installed units.

We look forward to more IWB users to join our site as well ;-)
